PROFILE SUMMARY

Data Engineer with 4+ years of experience building and managing data pipelines using Snowflake, Apache Spark (Java), and GCP. Skilled in ETL development, data quality, CI/CD automation, and Snowflake Cortex AI. Experienced in working with cross-functional teams to deliver reliable, scalable data solutions. Holds multiple certifications in GCP, Snowflake, and Databricks.

SKILLS

Technical Skills: Apache Spark, SQL, Snowflake, Snowflake Streams and Tasks, Snowflake Cortex AI, GCP, BigQuery, JAVA, Python, Astra DB (Cassandra), REST APIs, Data Warehousing

Tools: Git, GitHub, BitBucket, Flyway, Shell Scripting, JIRA, Control-M, Postman, Eclipse, VS Code, Maven, Putty

Generative AI Tools: GenAI (GPT models, GitHub Copilot, Snowflake Cortex Analyst, Snowflake Copilot)

Other: Agile/Scrum, Architecture Documentation, CI/CD Pipelines, Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

Associate Team Lead – Data Engineering | Tech Mahindra Feb 2026 – Present | Gurugram, India

- Set up Snowflake CI/CD pipeline using GitHub Actions and Flyway to automate schema deployments and version control, replacing a fully manual release process.
- Implemented Snowflake Cortex Analyst to enable Text-to-SQL capabilities, allowing business users to query data using plain English without writing SQL.
- Built a Snowflake Cortex AI Agent using Stored Procedures, Semantic Views, and Snowflake Tasks to monitor daily job execution counts and send automated email alerts when anomalies are detected.
- Worked with the Security team to identify and fix security vulnerabilities in the data platform, ensuring the project met compliance requirements.

Lead Software Engineer – Data Engineering | Persistent SystemsOct 2025 – Jan 2026 | Gurugram, India

- Led end-to-end delivery of data ingestion and transformation pipelines for marketing data using Apache Spark (Java) and GCP Dataproc, handling tens of millions of records per run.
- Improved data quality by automating validation and enrichment using AI copilots, reducing manual review effort and increasing accuracy for downstream analytics.
- Investigated and resolved pipeline failures caused by code bugs, schema changes, and upstream data issues, improving overall pipeline reliability.
- Worked with business stakeholders to gather requirements and convert them into solution designs, ensuring alignment with data architecture standards.
- Tuned Snowflake SQL queries and Spark jobs using partitioning and query optimization techniques to reduce runtime and compute costs.

Senior Software Engineer | Persistent Systems Jun 2024 – Sep 2025 | Pune, India

- Enhanced and scaled batch data pipelines on GCP Dataproc using Apache Spark to handle increased data volumes while meeting SLA targets.
- Created solution design documents and data flow diagrams used as technical references by both engineering teams and business stakeholders.
- Reviewed pipeline workflows to ensure compliance with data privacy and regulatory requirements.
- Monitored and managed Dataproc job execution, resolving production issues quickly to maintain high pipeline uptime.

Software Engineer | Persistent Systems Jun 2022 – Jun 2024 | Pune, India

- Developed ETL pipelines using Java and Apache Spark for large-scale contact data cleansing, deduplication, and transformation across multiple source systems.
- Designed Snowflake data warehouse schemas and wrote optimized SQL queries to support business reporting and analytics.
- Increased unit test coverage from 43% to 86%, reducing bugs in production and improving overall code quality.
- Built data validation logic to ensure accuracy and consistency of data ingested from various upstream sources.

Software Engineer – Intern | Persistent Systems Jan 2022 – Jun 2022 | Pune, India

- Completed training on Python, Java, SQL, Git, Maven, Snowflake, Apache Spark, PySpark, and Google Cloud Platform.
- Worked with Spark 3 DataFrames and Structured Streaming to process and analyze structured datasets.
- Used Spark SQL to query and transform data, building a strong foundation in distributed data processing.

EDUCATION

Bachelor of Technology in Computer Science and Engineering 2018 – 2022

JIS College of Engineering (JISCE), Kolkata | CGPA: 8.58

ACHIEVEMENTS

- Top Talent Award: Recognized for consistent high performance and project contributions in FY24 and FY25.
- Individual Bravo Award: Awarded for exceptional work that impressed client stakeholders and leadership.

CERTIFICATIONS

- Google Cloud Certified Professional Data Engineer
- Professional Cloud Architect (GCP)
- Generative AI Leader (GCP)
- Snowflake SnowPro Core Certification
- Databricks Certified Data Engineer Associate
- Salesforce Certified AI Associate
